contrast

saturation

Task 1

Box filtering

sharpening

Gaussian
Smooth

Task 1

Edge Detection

Task 3 Profiling

===== Profiling 1 =====

Profiling the Gaussian smoothing filter with increasing kernel size on a fixed image (e.g., 1024x1024) to analyze the scaling behavior.

profiling with gaussian kernel 7

conv takes time: 0.868352 ms

profiling with gaussian kernel 9

conv takes time: 1.413120 ms

profiling with gaussian kernel 11

conv takes time: 2.082816 ms

profiling with gaussian kernel 13

conv takes time: 2.790400 ms

profiling with gaussian kernel 15

conv takes time: 3.643392 ms

===== End of Profiling 1 =====

===== Profiling 2 =====

Profiling with fixed size smoothing filter (e.g., 25x25) on randomly initialized images of increasing size (128x128, ..., 1024x1024, ...) to analyze the scaling behavior.

profiling an random initialized image with image size 128

conv takes time: 0.764928 ms

profiling an random initialized image with image size 256

conv takes time: 2.208768 ms

profiling an random initialized image with image size 512

conv takes time: 9.953280 ms

profiling an random initialized image with image size 1024

conv takes time: 10.264576 ms

===== End of Profiling 2 =====

Bonus 2
